Portfolio: <https://sebachorx7.github.io/portafolio.page/>

## Web Developer

Frontend developer, I'd like to work with HTML, JavaScript and CSS, using frameworks as Tailwind CSS and React libraries or tools to build websites like WordPress.

I have knowledge in Python automation processes and handling programming languages like PHP, Java or frameworks like .NET.

Experienced in troubleshooting, maintaining, and upgrading hardware systems, including component replacement and performance optimization.

Proven ability to collaborate effectively in fast-paced, dynamic environments, with strong analytical skills and quick learning ability. Adept at working both independently and as part of a team to achieve project goals.

Responsible, and honest person, open to relocation for the right opportunity.

---

## Skills:

### • Soft Skills:

- Team Collaboration
- Problem-solving
- Flexibility
- Flexibility
- Attention to detail
- Creativity

### • Hard Skills:

- Frontend web pages: HTML, CSS, JavaScript, React, WordPress and Tailwind CSS
  - Programming Python: control structures and loops, list and dictionaries, file reading and writing, error handling and object-oriented programming (OOP)
  - Hardware Maintenance: Troubleshooting, component replacement, system upgrades, capable of diagnosing and repairing computer hardware and peripheral devices.
  - Proficient with version control systems, particularly Git and GitHub
-

## **Experience**

- **Secretary of Education. Bogotá, Colombia**

Help Desk Assistant

- Provided technical support for hardware and software issues.
- Assisted with troubleshooting network problems.
- Conducted regular maintenance of computer systems and peripherals

---

## **Education**

- **Currently:**

- I am taking a web design course, where I am learning about design principles, color schemes, layout of page elements, and more.
- I've been diving into concepts like supervised // unsupervised learning, decision trees, and neural networks. It's still early in the journey, but I'm enjoying this process and understanding how machines can learn from data.

- **IBM Full Stack software Developer**

- Coursera Professional Certificate JavaScript, React.

- **IBM Artificial Intelligence Developer**

- Coursera Professional Certificate IBM Watson

- **Computer Programming Diploma - Durham College, Oshawa, ON**

- Developed foundational skills in Python automation processes and handling programming languages like JavaScript, PHP, Java, or markup languages like HTML, and libraries like React, or frameworks like .NET or Tailwind CSS.
