

Automation Analyst & Python Developer

Technical-minded professional with academic background in Automation, Cybersecurity and Python development. Specialized in automated projects (Selenium, BeautifulSoup4), testing (UnitTest), software development lifecycle, integrating Frontend competencies (JavaScript, Tailwind CSS, Mobile-first design) and relational database management (SQL) under a "Security-by-Design" framework. Ability to build functional, secure web applications and prototypes using Figma, with a rigorous focus on Design Thinking and complex problem-solving.

Technically trained in vulnerability identification, process automation through Python scripting, and user interface optimization. A proactive collaborator with a steep learning curve and an analytical mindset, prepared to contribute to high-performance multidisciplinary teams in dynamic environments.

Technical Skills:

- **Programming & Scripting:** Python (OOP, Automation, Data Handling), JavaScript (ES6+), Automation and testing (Selenium, BeautifulSoup4, UnitTest)
- **Frontend Development:** HTML5, CSS3, Tailwind CSS, and Mobile-First Responsive Design, Figma (UI/UX Design).
- **Cybersecurity:** Vulnerability Assessment, Web Security
- **Databases & Data Integrity:** SQL (PostgreSQL, Microsoft SQL Server), Database Schema Design, and Data Validation.
- **Tools & Systems:** Linux Administration, Debian Trixie 13 and Git/GitHub.

Education

- **Certifications:**

ISC2 - CC Certified in Cybersecurity	Mar 2026
Microsoft - UI/UX Design Principles	Sept 2025
IBM - Getting started with Git and GitHub	Dec 2024
IBM - Python for Data Science, AI & Development.	Oct 2024
IBM - Introduction to Artificial Intelligence	Jul 2024
- **Computer Programming Diploma - Durham College** April 2024
Developed foundational skills in Python automation processes and handling programming languages like JavaScript, PHP, Java, or markup languages like HTML, and libraries like React, or frameworks like .NET or Tailwind CSS.

Experience

- Schwartz Chemical Company 2025 - Currently
Batch maker

A precision-oriented technical role responsible for the systematic production of chemical compounds, including adhesives, coatings, and sealants.

Precisely weigh, measure, and dispense raw materials (resins, solvents, and powders) into industrial mixers according to standardized Batch Tickets and proprietary formulas.

Safely operate heavy machinery, including high-speed dispersers, pumps, and forklifts.
- Aspects Retail 2022 - 2025
Case picker

Efficient fulfillment of large-scale retail orders.

Responsible for the accurate selection, palletizing, and staging of cases in a fast-paced distribution center environment.

Safely and proficiently operate Walkie-Rider to navigate high-traffic warehouse aisles.

Utilize Voice-to-Pick technology to accurately select products from warehouse racking based on customer orders.

Consistently meet or exceed hourly "pick rates" and accuracy benchmarks as defined by management.
